Description

The Roberts groover has been developed to deliver uniform grooves in hard flooring materials. Ideally suited for LVT, linoleum and vinyl, it is perfect for precision work on small to medium-sized floor areas.

Featuring an adjustable blade height and two blades that can be set to different heights, this tool allows for exact groove customisation. Its ergonomic handle ensures comfortable handling, while the built-in roller guide allows smooth and controlled movement across the floor.

- Designed to create consistent grooves in hard floor coverings
- Ideal for LVT, linoleum and vinyl
- Suitable for small to medium floor spaces
